

Macintosh OS 10.5 (Leopard) Evaluation

Mac OS X Leopard Software Compatibility Evaluation Summary

Product	Not Supported	Supported	Needs Update	Proposed Update Release
Adobe After Effects for Macintosh	Currently NOT Supported			
Adobe Premier for Macintosh	Currently NOT Supported			
Adobe Reader 8, CS 3 apps		http://www.adobe.com/support/products/pdfs/leopardsupport.pdf		
Cisco VPN Client	Cisco VPN client 4.9.00.0050 offered on the University IT site does NOT work on Leopard (Mac OS X 10.5)	The updated version will be made available shortly. Watch the IT Center website		
Disk Warrior		Until the update: Alsoft recommends that you don't run DiskWarrior 4.0 while started from Mac OS X 10.5 Leopard. Instead, you should start up from the DiskWarrior CD or any disk that starts up in Mac OS X 10.4.x and then run DiskWarrior 4.0	DiskWarrior 4.0 has some compatibility issues when running an installed copy of DiskWarrior under Mac OS X 10.5 Leopard (see DiskWarrior Support) The updated version will be made available shortly. (see DiskWarrior Support)	No ETA
EndNote	Currently, we have not yet announced the compatibility between Leopard and our supported software packages. We will post updated information here as it becomes available			No ETA
Eudora 6.2.4	Currently NOT Supported			No ETA
