

Dear Publisher:

Thank you for your attention to the enclosed submission. This article is based on research at the University of Rochester that is funded in whole or in part by grants from the US National Institutes of Health (NIH) and is therefore subject to the mandatory NIH Public Access policy (see <http://publicaccess.nih.gov/policy.htm>). As a matter of US federal regulation, the final, peer-reviewed manuscript must be deposited with the PubMed Central (PMC) database upon acceptance for publication and be made publicly available no later than 12 months after publication.

In order to ensure compliance with this mandate and to be sure that copyrights are addressed appropriately, we ask that EITHER:

- You, as the publisher, submit the article directly to PubMed Central after acceptance. In this case, we can work with your standard publication contract (so long as the standard publication contract confirms that the publisher will submit) and need only ask to be informed when submission is complete so that the required reference number(s) that must be used in subsequent NIH applications can be obtained. OR
- We will submit the article to PubMed. In such a case, the publication contract sent to the article author must include language that allows the author to retain the right to provide a copy of the final manuscript to NIH for public archiving on PubMed Central no later than 12 months after publication. The following wording is suggested by NIH:

"The Journal acknowledges that Author retains the right to provide a copy of the final manuscript to the NIH upon acceptance for Journal publication, for public archiving in PubMed Central no later than 12 months after publication by Journal."

Please indicate clearly if you have any requirements about when, within the allowable 12 month period, the article can be made public through PMC. We will deposit the article in PMC.

It is our hope that one of these options will be employed to ensure that we can cooperate to comply with this mandate. However, since this is a requirement of the current and future NIH funding which supports a great deal of research at the University of Rochester, we must ensure that our authors comply with the Public Access policy. If you accept this article for publication and none of the above options have been implemented, we will ask our authors to include the italicized passage above from the NIH as an additional term of any contract they sign and will proceed with depositing the article in PMC.

Thank you for your consideration and cooperation.

Sincerely,

Steve Dewhurst, Ph.D.
Sr. Associate Dean for Basic Research
University of Rochester Medical School

Paul F. Slattery, Ph.D.
Dean of Research
University of Rochester

Gunta J. Lidars
Associate VP for Research Administration
