This seminar examines a topic undergoing a bit of a resurgence of interest in International Relations: the role of territory in group politics. The goal is to build a basic understanding of why, when, how and which territory becomes contested. We will read from a broad range of disciplines and students are required to read at least 250-300 pages a week and in some cases significantly more.

Territorial conflicts are often viewed as the most contentious and intransigent in international politics. Territorial conflict is also one of the most frequent causes of interstate—and intrastate—war. But why is it that states (or sub-national actors) fight over territory? Is it because they seek economic benefits to be gained by additional territory, because they identify with specific territory, because they fear a rival taking over the territory, or for some other reason? In this class, we will focus on various perspectives that suggest causes of territorial conflict. We will evaluate these arguments in terms of both their logical consistency and the empirical record of territorial conflict.

Each student is expected to write a short paper for one session of their choice—picked in coordination with me—not to exceed 1500 words. This paper should provide an independent commentary on some aspect of that week’s readings. It is neither desirable nor necessary that you try to be comprehensive. Rather, you should select issues or angles that interest you, and develop your own thoughts about them. The paper must be circulated to the class via e-mail no later than Tuesday evening at 8:00 p.m. These papers will form the background against which we will discuss the readings in class.

In addition, each student is required to write a 20–25 page research paper, which focuses in depth on one of the discussed emerging research agendas. (Or, in exceptional cases, on an emerging research agenda of the student’s choosing.) This paper is due at the end of the first week of December. In the last sessions we will try to organize some time to discuss drafts and/or outlines of these papers.

I will call on students and expect each student to be prepared to begin the discussion of each reading with a short description of the central question, central argument and competing explanations. If discussion does not arise naturally, I will assign students responsibility for leading a discussion of particular works.
Course Requirements

Participation in the seminar comprises 25% of your grade. The short paper counts for another 25% of your grade, while the final paper counts for 50%.

I understand that students sometimes are faced with urgent situations, either of a personal or academic nature – e.g., a reading is not available or cannot be found – and in those cases, of course I welcome e-mails. Otherwise, I strongly prefer students show up for office hours, because dealing with 20 individual e-mails, and going back and forth, swallows enormous amounts of my time and concentration.

Books

The following books will be required reading this semester. I recommend you buy your books through Amazon.

Academic Integrity

Be familiar with the University’s policies on academic integrity and disciplinary action (http://www.rochester.edu/living/urhere/handbook/discipline2.html#XII). Violators of University regulations on academic integrity will be dealt with promptly, which means that your grade will suffer, and I will forward your case to the Chair of the College Board on Academic Honesty, on which I served.
Course Outline

Wednesday September 2

Class Cancelled--APSA Convention

Wednesday September 9

1. Territoriality

Wednesday September 16

2. Groups and Identity

   • Russell Hardin, *One for All; the logic of group conflict*; Princeton, NJ: Princeton University Press. Chapters 1–3

Wednesday September 23

3. Territory and the State

  Optional:
  Optional:

Wednesday September 30

4. The Size of States

Wednesday October 7

5. Territorial Identity

Wednesday October 14

6. Territory and Nationalism

Wednesday October 21

7. Territory, Borders and Nationalism

Wednesday, October 28

8. The Bases of Territorial Claims

Wednesday, November 4

9. Borders as Institutions

Wednesday November 11

10. Territory in International Relations: Conflict

Wednesday November 18

11. **Territorial Conflict**

Wednesday, November 25

12. **Thanksgiving recess**

Wednesday December 2

13. **Territorial Conflict and the Democratic Peace**

Wednesday December 9

14. **Territorial Conflict and Ethnic Politics**

Other readings of potential interest

**Territory and Geography as an explanatory variable**

Questions to consider in formulating and evaluating social science research

1. **What is the central question?**
   - Why is it important (theoretically, substantively)?
   - What is being explained (what is the dependent variable and how does it vary)?
   - How does this phenomenon present a puzzle?

2. **What is the central answer?**
   - What is doing the explaining (what are the independent variables and how do they vary)?
   - What are the hypotheses, i.e., what is the relationship between independent and dependent variables, what kind of change in the independent variable causes what kind of change in the dependent variable?
   - What are the causal mechanisms, i.e., why are the independent and dependent variables so related?
   - How do the independent variables relate to each other?
   - What assumptions does your theory make?
   - Is the theory falsifiable in concept?
   - What does this explanation add to our understanding of the question?

3. **What are the possible alternative explanations?**
   - What assumptions are you making about the direction of causality?
   - What other explanations might there be for the phenomenon of study, and to what degree do they conflict with the central answer?
   - Could the hypothesized relationships have occurred by chance?

4. **Why are the possible alternative explanations wrong?**
   - What is the logical structure of the alternative explanations (compare 2)?
   - What is the empirical evidence?

5. **What is the relationship between the theory and the evidence?**
   - What does the research design allow to vary, i.e., in this design are the explanations variables or constants?
   - What does your research design hold constant, i.e., does it help to rule out the alternative competing explanations?
   - How are the theoretical constructs represented empirically, i.e., how do you know it when you see it (measurement)?

6. **How do the empirical conclusions relate to the theory?**
   - How confident are you about the theory in light of the evidence?
   - How widely do the conclusions generalize, i.e., what might be the limitations of the study?
   - What does the provisionally accepted or revised theory say about questions of broader importance?
