Recycling efforts at University

Recycling efforts on the River Campus are increasing this year with added recycling sheds, collaborations with custodial staff and departments, and more publicity. In nearly 40 locations around campus, students, faculty, and staff can drop off recyclable materials. This includes 13 sheds, the blue metal containers that house totes for segregable materials. This includes 13 sheds, the blue metal containers that house totes for segregable materials. The Wilhelm Award, named for one of the founders of Princeton’s chemical engineering department, is a prestigious international research award presented annually by the 57,000-member organization. Feinberg is widely regarded by the chemical engineering community as a founder of the discipline known as chemical reaction network theory.

CTED to continue to provide service

Following an exhaustive analysis of internal and external options, the University has decided to continue to maintain an internal “telecommunications division”—but the process has led to an estimated $750,000 annual savings in telecommunications operations. “This long, hard look at the viability of outsourcing telecommunications was very productive,” said Provost Charles E. Phelps, who oversaw the review. “The bottom line was that it could not be done cheaper, or we believe, better by an outside vendor.” The telecommunications division bud on the project, as did a number of external firms. “This has obviously been an arduous process for the UTD staff, who had to do their normal jobs as well as prepare a proposal competing with some of the largest phone companies in the country,” Phelps said. “The fact that they came out so well in this process is a real tribute not only to their technical talents, but also to the

University offers home internet access

Members of the University community may now purchase dial-up, remote Internet access—a result of a recent agreement with VivaNET, Inc., and the University of Rochester. The University Telecommunications and Division (UTD) initiated the agreement to give off-campus students ResNet-like services such as a Web browser. Additionally, the service offers University faculty, staff, and students “virtual office” capability, as remote access users will be directly connected to the University network.

Employees can choose new medical plan

The annual open enrollment period for the 1997 University medical plans is being held during the fall of 1996. At this time, regular full- and part-time faculty and staff may choose to change and how it compares with others, to compare how a current medical plan has changed and how it compares with others, to compare how a current medical plan has changed and how it compares with others, to compare how a current medical plan has changed and how it compares with others, to compare how a current medical plan has changed and how it compares with others, to compare how a current medical plan has

Proviso Charles Phelps has announced the ap-
plication of a coordinator for disability ser-
vices to oversee and to develop a plan for en-
riching services for people with disabilities at the
University.

Jody Asbury, interim director of Interfaith
Chapel, will take over as the coordinator for
this project from Associate Provost Ruth
Freeman, Phelps said. The provost also
will appoint a team who will work with Asbury
to recommend ways of enriching services
throughout the University. The team will con-
duct its work over the fall semester, making
recommendations to the provost in
January.

During the summer, members of this team
will be working with disabilities to be submitted
at jasbury@macmail.cc.rochester.edu or
by memo to Asbury at the Interfaith Chapel.

Feinberg
Continued from page one

A field that attempts to uncover patterns in com-
plex systems of interrelated chemical reaction
networks; it is therefore considered a field of
chemical engineering. "The structure of the
discipline is all Feinberg's doing."

Feinberg's work bridges the gap between the chem-
istry and mathematics. He studies fundamental
properties of non-linear differential equations that
can be used to track the concentrations of reac-
tants in chemical systems that have dozens of
individual chemical components—something that
even mathematics cannot do.

Feinberg joined the Rochester faculty in 1967 and has taught a freshman engineering
chemistry course in decision making and fluid
mechanics, earning the University's Edward Peck
Catts Award for Excellence in Undergraduate Teaching in 1994.

He also has taught graduate courses in chemi-
cal reactor design and applied mathematics for
chemical engineers.

In Brief

Host a Thanksgiving dinner

Many students are unable to go home for
Thanksgiving break. The Rochester Office of
Student Life is offering a volunteer for campus
students interested in hosting a Thanksgiving
dinner. The office will pair interested volun-
teer students and a guest. Each Hospitality</p>

TRANSFER & PROMOTION OPPORTUNITIES

TRANSFER & PROMOTION OPPORTUNITIES

The University of Rochester is an Equal Opportunity Employer.

The following positions are posted to inform the public of the availability of positions. The University of Rochester welcomes applications from women and minorities. Persons with disabilities may contact the Office of Disability Services to request reasonable accommodations in the application process. These positions are available for immediate hire unless noted.

CENTRAL REGISTRATION REPRESENTATIVE—GRADE 43—CS on OPENS: University of Rochester, 601 Elmwood Avenue, Rochester, NY 14642. Establish and maintain relationships with University-wide units and units of affiliated hospitals and other health care facilities for the purpose of identifying, coordinating, and implementing new program and services. Requires Bachelor's degree or equivalent combination of education and experience. Requires: strong interpersonal skills, ability to work independently and as a team member, ability to follow directions, and strong communication skills. Requires: one year's related work experience. Retail experience preferred.

PARKING & ACCESS REPRESENTATIVE—GRADE 55—CS on OPENS: University of Rochester, 601 Elmwood Avenue, Rochester, NY 14642. Assist visitors and supervise parking lots, more than one parking lot; answer phones, direct visitors, and issue visitor passes; assist with parking enforcement; provide information to visitors, including directions. Requires: two years of parking experience in a related setting; ability to work independently; strong communication skills; ability to work in a busy, fast-paced environment; ability to work weekends and holidays. Requires: one year's related work experience; ability to work independently.
