1. Select the message by checking the box to the left of the message listing.
2. Click on the *Deliver Message* button or if you wish to receive all email from that sender, click *Deliver & Approve Sender*. Delivery is not immediate and may take 1 hour.

How do I Approve A Sender (Whitelist a sender)?

1. To prevent messages from being blocked by a particular sender, click on the **Approved Senders** link in the left side menu bar of the main screen.
2. Enter the address of the sender you wish to allow messages from and then click the **Add Sender** button.

Valid email addresses are of the form *user@domain*. The *user* may contain alphanumeric characters, the underscore (`_`), the dot (`.`) and the hyphen (`-`). The *domain* may contain alphanumeric characters, the hyphen and the dot.

Wildcards may also be used. Wildcards are used to match users at a particular domain. The wildcard character is the asterisk (`*`), which will match any set of alphanumeric characters and underscores.

To match bob@example.net one would use `*@example.net`.

To match bob.smith@example.net one would use `*.smith@example.net`.

To match an entire domain, one would use `@example.net` or `**@example.net`.
