

## General Configuration Settings for UR\_Connected

**If using a device where there is listed as a “future addition”, you may still apply general configuration settings on your device. For UR\_Connected, the following represent the general settings**

Network Authentication = “WPA2” or “WPA2 Enterprise”

Data Encryption = AES

EAP Type = “Protected EAP (PEAP)”

Authenticate as a computer

For “Protected EAP Properties”

Validate server certificate

Authentication Method = “Secured password (EAP-MSCHAP v2)”

Set “Enable Fast Reconnect”

Enable “Automatically use my Windows logon name and password”

Enter your user name

Enter your password

Enter Logon Domain of “UR”

If your device requires it, the certificate is enabled as “Entrust.net Secure Server Certification Authority”
