

## Windows Phone 7 Configuration for UR\_Connected

{Please note that the quality of the screenshots is subject to lack of a screenshot function on Windows Mobile 7 Phone}

	<p>Before starting, ensure that you get to this standard “tiles” screen for Mobile 7. You can press the Windows logo-imprinted button usually on the bottom of the device.</p> <p>Note the arrow in upper right portion of screen. Swipe your finger from the right side of the screen to the left. This will scroll to the screen on the right. It gets intuitive.</p>
	<p>You should be at a screen where the first entry is “Alarms”. Swipe your finger from the bottom of the window upwards.</p> <p>Tap the “Settings” icon, usually at the bottom of the list.</p>

 A screenshot of the Windows Phone 7 Settings application. The screen shows a list of settings options: 'system applications', 'ringtones & sounds' (with 'Into the Sea' below it), 'theme' (with 'blue' below it), 'airplane mode' (with 'turned off' below it), 'Wi-Fi' (with 'turned off' below it), 'Bluetooth' (with 'turned off' below it), 'email & accounts' (with 'set up email, contacts, Facebook, and others' below it), and 'lock & wallpaper'. The time '9:56' is visible in the top right corner.	<p>Tap the “Wi-Fi” entry for Wireless.</p>
 A screenshot of the Windows Phone 7 Wi-Fi settings screen. The title is 'Wi-Fi' under the 'SETTINGS' header. Below the title, it says 'Wi-Fi networking' and 'Off'. To the right of the text is a slider control that is currently in the 'Off' position.	<p>If your device indicates that wireless is “Off”, put your finger on the slider and move it to the right. This will turn wireless on and look for any wireless networks that are being broadcasted.</p>

	<p>After moving the slider, your device will tell you what wireless networks it sees. Tap on UR_Connected.</p>
	<p>If this is your first time connecting to "UR_Connected" on this device, you will be prompted for a username and password.</p> <p>Type your domain account username in the first line and your domain account password in the second line.</p> <p>The "Done" button will light up on the bottom left part of the screen. Tap "Done".</p>

 A screenshot of the Windows Phone 7 'Sign in' screen. The time is 9:57. The screen displays 'Connecting to the secure Wi-Fi network UR_Connected.' Below this, there are input fields for 'User name' (containing 'yourusername') and 'Password' (containing seven asterisks). A virtual keyboard is visible at the bottom, and there are 'done' and 'cancel' buttons.	<p>You'll see the indication that the device is connecting to "UR_Connected".</p>
 A screenshot of the Windows Phone 7 'Settings' screen, specifically the 'Wi-Fi' section. The time is 9:58. 'Wi-Fi networking' is turned 'On'. There is a checkbox for 'Notify me when new networks are found' which is checked. A list of Wi-Fi networks is shown: 'UR_Connected' (connected), 'UR_RC_MacPilot' (open), 'UR_RC_Guest' (open), and 'UR_RC_InternalSecure' (secure).	<p>You will then see this screen. Note that UR_Connected shows the word "connected" in blue just below it.</p> <p>UR_Connected!</p>
