

## iPhone, iPad and iPod touch Configuration for UR\_Connected

|  |   |
|--|---|
|  <p>The screenshot shows the iPod touch Settings app with the 'Wi-Fi Networks' screen. At the top, the status bar shows 'iPod', '12:57 PM', and a battery icon. Below the status bar, there is a 'Settings' button and the title 'Wi-Fi Networks'. A 'Wi-Fi' toggle switch is turned 'ON'. Underneath, there is a section titled 'Choose a Network...' with a list of available networks: 'Home-connect', 'UR_Connected', 'UR_RC_Guest', 'UR_RC_InternalSec...', 'UR_RC_MacPilot', and 'Other...'. Each network entry has a lock icon, a Wi-Fi signal icon, and a blue arrow pointing right. At the bottom, there is an 'Ask to Join Networks' toggle switch, which is also turned 'ON'.</p> | <p>Before Starting, ensure that you have WiFi enabled on your device</p> <p>Open your Network Settings</p> <p>From the Home Menu</p> <p>→Settings → WiFi</p>  <p><p>The screenshot shows the iPod touch Settings app with the 'Wi-Fi' screen. The status bar shows 'iPod', '12:16 PM', and a battery icon. Below the status bar, there is a 'Settings' title bar. Underneath, there is a 'Wi-Fi' toggle switch, which is turned 'ON', and the text 'Not Connected' with a right-pointing arrow.</p><p>A List of WiFi networks will appear, select <b>UR_Connected</b></p></p> |
