

#### NIH Non-competing Progress Reports - Greater than Minimal Risk Studies

The following key personnel have completed the University of Rochester's Human Subject Protection Program. This self-directed instructional program is designed to provide education in the ethics of using human subjects in research. The program is made up of fifteen modules which include such topics as "Ethics and Federal Regulations," "Roles and Responsibilities of Institutions in Human Subject Research," "The Roles and Responsibilities of the Investigator and the Study Process," and "Behavioral Research Issues" among others. The program provides a substantial resource to the investigator for understanding the ethics and regulations governing research with human subjects.

Successful completion of an examination is required for fulfillment of the program.

#### NIH Non-competing Progress Reports - Minimal Risk Studies

The following key personnel have completed the University of Rochester's Ethical Principles in Research Program. This self-directed instructional program provides an in-depth look at the Belmont Report and provides the information necessary to understand the fundamental requirements, responsibilities and ethical issues related to the use of human subjects in research. Successful completion of an examination is required for fulfillment of the program.
