**Subject:** OSTP - Assistance for Researchers

Dear Colleagues,

Yesterday, the Chronicle of Higher Education had an article entitled, "[Librarians Leap to the Aid of Researchers Whose Funding Will Soon Depend on Open Access.](#)"

I wanted to apprise you of services we have at the River Campus Libraries to assist researchers in complying with funder requirements for public access, with the major aspects of those requirements:

- writing data management plans, and
- providing public access to publications and data.

Kathleen Fear, Data Librarian, is positioned to assist as are our Outreach Librarians. Information can be found using this OSTP libguide:

<http://libguides.lib.rochester.edu/publicaccess>.

Please share this with faculty as you wish.

Best regards,

Mary Ann

Mary Ann Mavrinac, MLS, EdD

Dear Colleagues:

First, I'd like to thank Dean Mavrinac for her recent email to **River Campus** researchers.

Likewise, if you're a researcher at the **Medical Center**, skilled librarians at Edward G. Miner Library are available to assist you.

Whether you need help in complying with NIH requirements for public access, writing a data management plan, or building your SciENCv, we're here to help. Simply contact Linda Hasman ([linda\\_hasman@urmc.rochester.edu](mailto:linda_hasman@urmc.rochester.edu)) or your department's [Librarian Liaison](#).

In either case - north side of Elmwood or south - we hope you'll contact your librarians.

Sincerely,  
Julia Sollenberger
