Arts, Sciences, and Engineering

Chen Ding
Professor of Computer Science
My research concerns programming systems in general and locality in computer memory in particular, involving both theorizing and system building. I teach programming languages and program design for speed and correctness. I joined the faculty in 2000. In 2007, I was a visiting researcher at Microsoft Research at Redmond WA and a visiting associate professor at the EECS department at MIT. This year, I am honored to receive the College Award for Undergraduate Teaching and Research Mentorship. Computer science as an academic field is rapidly inventing new computing methods and tools, yet many of the societal problems are being created or exacerbated by the computer industry. Education, as always, is important and perhaps more so now. My motivation to join the Faculty Senate is to contribute to the discussion and decision making on academic matters based on my perspectives and knowledge of technology.

Gourab Ghoshal
Associate Professor of Physics, Mathematics and Computer Science

Eastman School of Music

William Marvin
Assoc. Professor of Music Theory, Eastman School of Music
My research engages analysis of nineteenth century opera, especially the works of Richard Wagner, as well as instrumental music of the eighteenth and nineteenth centuries. Additional work engages Broadway musicals and the pedagogy of music theory. I am the editor of the Journal of Music Theory Pedagogy, and past president of the Music Theory Society of New York State. I joined the Eastman faculty in 2002, after having taught at Oberlin Conservatory.

Simon School of Business

James Brickley
Gleason Professor of Business Administration
My teaching and research interests are in the areas of managerial economics and corporate governance. I have served on the Simon School's Promotion and Tenure Committee for many years and am currently its Chairman. In the past, I served on the University's Standing Committee for Promotions. I am well versed in issues and policies related to Promotion and Tenure at both the University and Simon School levels. Currently, I am serving as Chairman of the Simon School's Dean Search Committee.

Phil Lederer
Associate Professor of Operations Management
Warner School of Education

Jayne Lammers
Associate Professor of Education

My scholarship explores adolescents’ interest-driven digital literacy practices, including their fan-based writing and use of online spaces to collaborate and co-construct knowledge across people, networks, and resources. I’ve recently adopted a more global perspective to my work, conducting research with scholars and young people in Indonesia. I enjoy putting my work in conversation with others through collaborative, interdisciplinary projects that disrupt and transcend boundaries. I joined Warner’s faculty in 2011, where I serve as Director of Secondary English teacher preparation and am a founding Associate Director in the Center for Learning in the Digital Age. I intend to bring my commitment to equity to bear on the vital work UCTP does to support our university community.
