About the Program

Supported by a generous donation from the Xerox Corporation, this program provides research funding for engineering students in the summer following their sophomore or junior year, followed by continued research under the direction of the same faculty mentor during the following academic year. Xerox Undergraduate Research Fellows also receive assistance in the process of applying for graduate school or for placement with industry. To date, the program has served over 130 undergraduate students.

Xerox students are also eligible to enroll in a fall semester class that guides them through the process of applying to Ph.D. programs, as well as fellowships and national awards for graduate study.

Statistics

- 100% of our first cohort enrolled in graduate school.
- 69% of all Xerox Fellows graduates have enrolled in graduate school.
- 40% of our graduates are currently enrolled in a Ph.D. or other doctoral program.
- 33% of our graduates have already earned a graduate degree.
