Honorary Awards

Robert Shannon ’54, ’57 (MA)
Doctor of Engineering

Robert Shannon has been a prolific leader in the optics community. He received a bachelor’s and a master’s degree from the Institute of Optics at the University in the 1950s and began his career at Itek Corporation in Massachusetts, at the time a leading builder of early satellite reconnaissance systems. While there, he was involved in the design of several of the optical systems to be used in space observation systems, and he progressed to director of Itek’s Advanced Technology Labs.

After a decade at Itek, Shannon joined the faculty of the Optical Sciences Center at the University of Arizona, ultimately serving as director of the center. He added an undergraduate optics program, expanded the center’s physical space, taught optical design, was the advisor to many MS and PhD students, and was responsible for several research and engineering projects. Known for inspiring his students to excel, Shannon was above all a mentor to students, the source of his greatest career pride.

Shannon has served as president of Optica (formerly the Optical Society of America) and of what is now known as SPIE, the international society for optics and photonics. He has been a member of many government advisory committees and was elected a member of the National Academy of Engineering. He has been a member of the Aerospace Corporation Board of Trustees, was a participant in NASA’s Hubble Telescope Mirror Recovery Panel, a member of the Technical Advisory Group at the NRO, and a member of the US Air Force Scientific Advisory Board. The recipient of the SPIE Gold Medal, the society’s highest honor, in recognition of his exceptional contributions to the advancement of optics, he also received an honorary degree from the Centro de Investigaciones en Optica (also known as CIO) in Leon, Mexico.

Shannon is especially proud of his large extended family, which includes six children and several grandchildren and great-grandchildren.

James Wyant ’67 (MS), ’69 (PhD)
Doctor of Science

James Wyant is a professor emeritus and the founding dean of the James C. Wyant College of Optical Sciences at the University of Arizona. The college, where he has been a faculty member since 1974, was renamed in his honor in 2019. A pioneer in the field of optics, Wyant has made significant contributions as an academic leader, entrepreneur, and inventor.

A leader in the field of optical metrology, Wyant is a founder of two companies that produce optical measuring equipment: the WYKO Corporation, which he served as president and board chair from 1984 to 1997, and the 4D Technology Corporation, which he served as board chair from 2002 to 2018. He has served on several other boards, including for Veeco Instruments, DMetrix, Optics 1, and ILX Lightwave.

Over the course of his groundbreaking work in optics and photonics, Wyant has received several awards, including the Joseph Fraunhofer Award from Optica (formerly the Optical Society of America); the Gold Medal as well as the Visionary Award from SPIE, the international society for optics and photonics; the State of Arizona’s Innovator of the Year Award; the University of Arizona’s Technology Innovation Award; and the Distinguished Alumnus Award from Rochester’s Hajim School of Engineering & Applied Sciences. Most recently, he received Optica’s 2022 Frederic Ives Medal/Jarus W. Quinn Prize, the organization’s highest award.

Wyant has also made significant contributions to the life of the University over several decades. He taught in the Institute of Optics Summer School from 1981 to 2015; served on the Board of Trustees from 2012 to 2017, after which he became a Life Trustee; and honored his former optics professor by establishing the M. Parker Givens Professorship in Optics. He later established an additional professorship at the Institute of Optics.

Wyant is a member of the National Academy of Engineering and of the National Academy of Inventors, a fellow and former president of Optica, and a fellow and former president of SPIE. He received a bachelor’s degree in physics from Case Western Reserve University before earning master’s and doctoral degrees in optics from Rochester.
Brenda D. Lee, MEd
EASTMAN MEDAL

Brenda Lee is an accomplished administrator and medical educator as well as a national advocate for diversity in health care professions. Widely recognized for her leadership designing and monitoring resources and services for students of color and coordinating affirmative action recruitment and retention, Lee has been at the forefront of tackling barriers to access and inclusion in medical education.

In 1987, Lee joined the University, serving 29 years as assistant dean for medical education and what’s now student affairs at the School of Medicine and Dentistry. Notably, in 1990, she worked with deans from other New York medical schools on federal funding to launch a first-of-its-kind program to prepare promising, historically excluded students for success in medical schools, including at Rochester.

Lee also served as an assistant professor in the University’s Division of Medical Humanities, and she was an associate for both the Susan B. Anthony Institute for Gender, Sexuality, and Women’s Studies and the Frederick Douglass Institute for African and African-American Studies.

Over the years, she has spoken or presented at conferences for regional and national organizations, including the Urban League of Rochester, Cornell University, the Associated Medical Schools of New York, the National Association of Medical Minority Educators, and the Association of American Medical Colleges.

In 2018, she was appointed the Frederick H. Minett Professor at Rochester Institute of Technology, a yearlong academic position that brings distinguished Rochester-area multicultural professionals to campus to share their professional experiences and expertise.

Her many awards include the School of Medicine and Dentistry Faculty Diversity Award, the Black Physicians Network of Greater Rochester Lifetime Achievement Award, and the Howard Coles Society Community Leadership Award from the United Way of Greater Rochester.

Lee earned a bachelor’s degree in psychology from the University of Wisconsin–Stevens Point and a master’s degree in education from Antioch University.

Kenneth R. French ’78S (MBA), ’81S (MS), ’83S (PhD)
CHARLES FORCE HUTCHISON AND MARJORIE SMITH HUTCHISON MEDAL

Kenneth French is the Roth Family Distinguished Professor of Finance at the Tuck School of Business, Dartmouth College. French is an expert on the behavior of security prices and investment strategies. He is well known for his research on these and other topics in finance.

French is a research associate at the National Bureau of Economic Research, an advisory editor of the Journal of Financial Economics and the Financial Review, a former associate editor of the Journal of Finance and the Review of Financial Studies, and a former president of the American Finance Association. French is also a fellow of the American Finance Association, the Financial Management Association, and the American Academy of Arts and Sciences; chair of the Valpo Surf Project’s global board of directors; a member of the board of directors of Grasspool Soccer and of the International Rescue Committee; and a recipient of the International Rescue Committee’s annual Humanitarian Leadership Award.

French is a consultant to Dimensional Fund Advisors and a member of the firm’s board of directors. He is also cochair of Dimensional’s Investment Research Committee and a regular speaker at Dimensional conferences and seminars.

Before joining Dartmouth, French was on the faculty of MIT’s Sloan School of Management, the Yale School of Management, and the University of Chicago Booth School of Business. French received a PhD in finance from the University of Rochester in 1983. He also earned an MS and an MBA from the University of Rochester and a BS from Lehigh University.

Deborah C. German, MD, ’79M (Res)
CHARLES FORCE HUTCHISON AND MARJORIE SMITH HUTCHISON MEDAL

Deborah German is the vice president for health affairs at the University of Central Florida and the founding dean of the UCF College of Medicine.

Under German’s leadership, the College of Medicine achieved full accreditation, provided full scholarships to its entire charter class, built a team of more than 900 faculty and staff, and completed construction of a medical campus and creation of the Academic Health Sciences Center.

Prior to her roles at the University of Central Florida, German spent several years in leadership positions at Vanderbilt University and in the Greater Nashville area. In 1988, she became associate dean of students and, later, senior associate dean of medical education.

After 13 years at Vanderbilt, she was named president and CEO of Saint Thomas Hospital in Nashville, where she led a turnaround that won her national attention. She served on the board of trustees of the Tennessee Medical Association, chaired the Tennessee board of directors for the Arthritis Foundation, and served as national chair of the Association of American Medical Colleges’ Group on Student Affairs.

German began her medical research and administrative career at Duke University as a faculty member at Duke Medical School and as a researcher at the Howard Hughes Medical Institute. During her time at Duke, German also directed the Duke Gout Clinics and served as associate dean of medical education while maintaining a private practice in internal medicine and rheumatology.

German has received many accolades, including the AAMC Women in Medicine Leadership Development Award. She was also named a Local Legend of Medicine in the National Library of Medicine and has been regularly recognized by Orlando area business organizations.

German earned a bachelor’s degree in chemistry from Boston University and a doctor of medicine from Harvard Medical School. She completed a residency in internal medicine at the University’s Strong Memorial Hospital as well as a fellowship in rheumatic and genetic diseases at Duke University.
Thomas P. Slaughter, PhD  
**WILLIAM H. RIKER UNIVERSITY AWARD FOR EXCELLENCE IN GRADUATE TEACHING**

Thomas Slaughter is the Arthur R. Miller Professor in the Department of History. He also directs the University’s Seward Family Archive Project in collaboration with the River Campus Libraries.

Over his career at Rochester, Rutgers, and Notre Dame, Slaughter has advised over 20 doctoral students. Those who have earned their doctorates under his guidance are now faculty members, editors, and public historians at universities, in government, and at museums.

With his principal research interests in the American Revolution, slavery and abolition, race relations, humans in nature, political violence, and the history of families, Slaughter has published six books and edited three collected volumes in addition to the edition of Seward family correspondence, among his large body of scholarly work.

As director and editor in chief of the Seward Family Archive Project, Slaughter leads a multidisciplinary, digital humanities initiative to make important historical materials accessible to the public and to other scholars. Working closely with students—both undergraduate and graduate—senior-citizen volunteers, and librarians and curators from Rush Rhees Library, he oversees transcription, annotation, coding, and digitization of the collected papers of the New York family that played influential roles in 19th-century American politics, foreign policy, and society. Housed at Rush Rhees Library, the collected materials are accessible at sewardproject.org.

Slaughter earned a doctoral degree in history from Princeton University. He holds bachelor’s and master’s degrees from the University of Maryland, College Park. Prior to joining the Rochester faculty, he held a named professorship at the University of Notre Dame. Among his many honors, he is a fellow of both the American Antiquarian Society and the Society of American Historians. His research and his work on the Seward Project have earned the support of the National Endowment for the Humanities, the Fred L. Emerson Foundation, the Robert D. L. Gardiner Foundation, the John Simon Guggenheim Foundation, the American Council of Learned Societies, and the American Philosophical Society.

William Thomson, PhD  
**LIFETIME ACHIEVEMENT AWARD IN GRADUATE EDUCATION**

William Thomson is the Elmer B. Milliman Professor in the Department of Economics.

Since joining Rochester’s faculty in 1981, he has earned recognition as an economic theorist, a talented communicator of economic ideas and policies, and a prominent advisor to students who have been appointed as faculty members at some of the most highly regarded universities and colleges around the world. During his 40-year tenure, he has supervised the doctoral theses of more than 50 students and served as a committee member for nearly two dozen more.

As an economist, Thomson has been influential in advancing the field’s understanding of resource allocation, the challenge of how to distribute scarce goods that are in high demand among multiple competing interests. With expertise in game theory, mechanism design, and the history of economics, he has helped develop models that explore ways to address issues involving allocation and equity as well as the economic choices that underlie modern society.

A fellow of the Econometric Society, Thomson has held leadership roles in several of the field’s most prominent academic societies and editorial boards. Widely recognized for his teaching and mentorship of graduate students, he received the University’s Award for Excellence in Graduate Teaching in 2001.

He is the author of Guide for the Young Economist (MIT Press, 2001), which distills many of the lessons and advice that he has honed from teaching future members of the economics profession. A 2011 edition of the book includes a new chapter titled “Being a Graduate Student in Economics.” Often cited as an important resource by his students, the book has been translated into four languages. His latest book is How to Divide When There Isn’t Enough: From Aristotle, the Talmud, and Maimonides to the Axiomatics of Resource Allocation (Cambridge University Press, 2019).

Thomson earned a doctoral degree in economics from Stanford University, following master’s degrees in engineering from École Polytechnique in Paris. He was a member of the economics faculty at the University of Minnesota and Harvard University before joining Rochester’s faculty in 1983. He was named a full professor at Rochester in 1985.

Christopher D. Azzara ’88E (MM), ’92E (PhD)  
**EDWARD PECK CURTIS AWARD FOR EXCELLENCE IN UNDERGRADUATE TEACHING**

Christopher Azzara is professor of music teaching and learning and an affiliate faculty of jazz studies and contemporary media at the Eastman School of Music.

A pianist, arranger, author, and educator, he has taught and performed on four continents and made vital contributions to advancing the understanding of creativity and improvisation in the music learning process.

Azzara’s specializations include improvisation, instrumental music education, music reading comprehension, jazz studies, and composition and arranging.

All first-year Eastman students who are music education majors must take the course Introduction to Music Teaching and Learning, which Azzara has taught for 20 years. He also teaches undergraduate and graduate courses in instrumental music methods and improvisation, supervises student teachers who are placed in the Rochester and Buffalo areas, mentors graduate teaching assistants, and advises research.

The author of numerous articles, arrangements, and books, he performs as a soloist and as part of ensembles, including the Chris Azzara Quartet. In Rochester, he performs with freelance musicians, other members of the Eastman faculty, and members of the Rochester Philharmonic Orchestra. An active teacher and clinician, he has taught and performed extensively throughout the United States and in Canada, the Caribbean, and Europe. He has presented clinics and workshops in a variety of settings, including TEDxRochester, the Pittsburgh Symphony Orchestra, Carnegie Hall, and leading music schools in the United States and abroad.

Azzara received a bachelor of music degree from George Mason University in 1981. He taught instrumental music in Virginia public schools and performed as a pianist in the Washington, DC, area. He earned a master of music degree from Eastman in 1988 and a doctoral degree in 1992.
Joel F. Burges, PhD
Edward Peck Curtis Award for Excellence in Undergraduate Teaching

Joel Burges is an associate professor of English and of visual and cultural studies in the School of Arts & Sciences. He also teaches courses in film and media studies and digital media studies.

Burges’s research centers on post–1945 culture, especially the intersection of aesthetics and economics in film, television, and literature. His first book, Out of Sync & Out of Work (Rutgers University Press, 2018), explores how the obsolescence of labor is represented in film and literature. He is currently at work on a new book that examines writing for television as both economic labor and aesthetic craft and on a series of essays about economic stagnation in contemporary film and television.

In addition to advising and mentoring graduate students, Burges is a dedicated instructor who has taught a wide range of courses, from introductory undergraduate lectures to advanced graduate seminars, as well as coursework in writing and rhetoric.

Since 2012, Burges has been the principal investigator on Mediate, a digital tool that lets students annotate audiovisual media—from film and television to music and advertising. Developed in collaboration with the Digital Scholarship Department at River Campus Libraries, the open-source, web-enabled platform has been used by the University as well as at the University of Pittsburgh, Bowdoin College, and Wake Forest University.

Burges has used Mediate in his courses as a means of developing students’ media literacy, a fundamental skill in the 21st century, while also forming a humanistic network of students, faculty, staff, and librarians through cross-disciplinary teaching with the platform. The tool’s significance became especially evident during the COVID-19 pandemic, when it allowed its community members—at Rochester and beyond—who were isolated to connect intellectually.

Burges earned a bachelor’s degree in American studies from Yale University in 1997 and a doctoral degree in English and American literature from Stanford University in 2007. He has held multiple fellowships from the Andrew W. Mellon Foundation as well as fellowships from Stanford, Massachusetts Institute of Technology, Wellesley College, and Indiana University, Bloomington.

Roy Jones, PhD
Edward Peck Curtis Award for Excellence in Undergraduate Teaching

Roy Jones is a clinical associate professor at the Simon Business School. He has been a faculty member since 1998, teaching computers and information systems to undergraduates, MBAs, medical management students, executive students, and PhD candidates.

Jones has taught 14 courses at Simon, including Business Information Systems and Analytics, a core course in the Barry Florences Undergraduate Business Program. He recently helped develop the new information systems track in the undergraduate business program and serves as an advisor for that track as well as the business analytics track and for data science majors.

In his capacity as chair of Simon’s undergraduate curriculum committee, he has overseen the development of 15 new business courses, contributing to an increase in business course enrollments of more than 400 students per semester over the past four years. In the past seven years, he has taught more than 1,100 students.

His impact reaches far outside the University as well. He received the Information System Society’s Teaching Innovation Award in 2020 and cochaired the IT Teaching Workshop from 2017 to 2019 at the University of California, Irvine; Boston University; and the University of Pennsylvania’s Wharton School.

At the start of the COVID-19 pandemic, Jones coauthored with colleague Ravi Matena a faculty best-practices document that continues to guide Rochester faculty as they navigate hybrid teaching.

Jones’s educational background is wide ranging. He earned a bachelor’s degree in history; a master’s degree in computer science; and a doctoral degree in operations, information, and technology, all from Stanford University. In 1988, he cofounded a database consulting firm, 4th Connection Consulting, Inc., where his consulting clients included several Fortune 500 firms.

Jones’s research focuses on markets for information goods and the impact of development costs and the complexity of the development process on market structure. His interests include the economics of information systems, electronic business, health information technology, and the evolution of the information technology industry.

His work has appeared in a number of publications, including Cardiology Journal, Critical Connections, and Management Science.

Stefanie A. Sydelnik ’08 (MA), ’16 (PhD)
Edward Peck Curtis Award for Excellence in Undergraduate Teaching

Stefanie Sydelnik has multiple roles in the Writing, Speaking, and Argument Program (WSAP). She is the associate director as well as an instructional track associate professor, and she directs the program’s Writing and Speaking Center.

Sydelnik began teaching in WSAP in 2004. During her first three years with the program, she served as a writing tutor, writing placement reviewer and advisor, assessment reader, Early Connection Opportunity (ECO) Program writing instructor, and coordinator of what was then called the Writing Center.

In 2007, she took on greater leadership roles, orienting and training writing instructors. She also became head writing instructor for the ECO Program, where she designed reading, writing, and research assignments around free speech debates on campus, including discussion of hate speech policies.

Sydelnik was named assistant director of the program in 2011 and promoted to associate director in 2014. In her first years as associate director, she played a key role in the review and revision of the primary writing requirement for the College and in developing a minor in writing studies. She coteaches the department’s graduate pedagogy courses and is a principal author of the program’s guide for instructors.

As the instructor for Advanced Writing and Peer Tutoring, she has mentored undergraduate students through the process of developing, presenting, and publishing writing studies research. Under her guidance, several students have published or presented their work at national conferences.

Sydelnik has pursued a range of teaching and scholarly interests, including writing center theory and practice, writing pedagogy, course design, writing program administration, writing studies research, undergraduate research, 19th-century American literature, antislavery literature, print culture, and popular media. She currently serves as cochair of the Writing, Speaking, and Argument Program’s Building an Equitable Community: Anti-racism, Anti-hate committee.

She earned a bachelor’s degree in English and dance from Skidmore College and master’s and doctoral degrees in English from the University.
Thomas S. Weber, PhD  
G. Graydon Curtis ’58 and Jane W. Curtis Award for Nontenured Faculty Teaching Excellence

Tom Weber is an assistant professor of earth and environmental sciences in the School of Arts & Sciences. His research focuses on the numerical modeling of ocean biogeochemical processes and predicting how marine ecosystems will respond to and modulate climate change. He combines ocean models and large datasets to quantify nutrient sources and sinks and to track the production and fate of organic carbon as it cycles through the “biological pump.”

Since he joined the University of Rochester in 2016, Weber has taught graduate and undergraduate courses that cover topics from climate change to physical oceanography to ocean modeling. He has mentored undergraduate and graduate students in research on natural biogeochemical processes in the oceans and the Great Lakes, with investigations into the dynamics of the greenhouse gases carbon dioxide, methane, and nitrous oxide formed in these environments, as well as the cycling of key elements controlling marine photosynthesis.

Weber is also involved in the global GEOTRACES project, which aims to map the distributions of rare elements in the ocean and understand their cycling processes. He is designing new data-assimilating models to interpret observations from the ongoing field campaign.

Weber’s work has been supported by the National Science Foundation, the National Academy of Sciences, and NASA. He has published papers in highly respected, international peer-reviewed journals, including Nature, Science, Nature Communications, Nature Geosciences, and Proceedings of the National Academy of Sciences.

Weber graduated from the University of Leeds with bachelor’s and master’s degrees in geological sciences before completing a second master’s degree and a doctoral degree in atmospheric and oceanic science at the University of California, Los Angeles, in 2013. Before joining the Rochester faculty, Weber was a postdoctoral research associate at the University of Washington School of Oceanography.

Stephen M. Wu, PhD  
G. Graydon Curtis ’58 and Jane W. Curtis Award for Nontenured Faculty Teaching Excellence

Stephen Wu is an assistant professor of electrical and computer engineering in the Hajim School of Engineering & Applied Sciences and of physics and astronomy in the School of Arts & Sciences. His research focuses on the use of quantum materials to create next-generation nanoelectronic and quantum electronic devices.

In 2020, he received a National Science Foundation Faculty Early Career Development (CAREER) award to support his research and education efforts involving two-dimensional materials as thin as a single layer of atoms. When stretched and pulled, these materials can transform from being superconducting one moment to nonconducting the next. Wu is exploring these changes when they occur in transistor-scale device platforms, which could transform electronics, optics, computing, and a host of other technologies.

Wu has published in numerous journals, including Nature Nanotechnology, Nature Materials, Physical Review Letters, Applied Physics Letters, Nano Letters, and Journal of Applied Physics. In addition to his research contributions, he developed a graduate course in nanoelectronic devices. He also teaches a course on quantum electronic devices and materials for graduate students and one on electronic devices and circuits for undergraduates.

During the pandemic, Wu mastered the “flipped” teaching model, in which he makes short, high-quality recordings that students can view in their own time. He then uses the allotted classroom time to solve questions. Wu’s instructional methods have been a resource for his students and a model for fellow faculty.

Several undergraduate students have worked in Wu’s laboratory, typically undertaking self-contained projects related to nanoelectronics or quantum materials. His students give presentations and coauthor publications, with many having gone on to prestigious graduate programs or industrial positions.

Wu earned a bachelor of science degree in electrical engineering and computer science, as well as a bachelor of arts in physics, before completing master’s and doctoral degrees in physics—all at the University of California, Berkeley. He served as a postdoctoral researcher at Argonne National Laboratory before joining the University of Rochester in 2017.
