

Security Tip of the Week

Cloud Computing – Did You Know?

Advantages

- **Reduces the risks involved with physically carrying data around on removable media**
- **Users often have on-demand access to their information**
- **Easier collaboration with others**

Disadvantages

- **Control is with someone else**
- **Cloud vendors often have transparent or inadequate service level agreements**
- **Many cloud vendors are new businesses and their future and success is uncertain.**

*Do you have ideas that should be shared as security tips of the week?
If so, please send them to UnivIT_SP@ur.rochester.edu*
