

## Instructional Tools & Resources

Please use the following table to help you identify the instructional resources for your course. Think about the tools and consider which of those would be supportive of the learning activities in your course or what content you might create. You should also explore MERLOT, OER Commons, Ted-Ed, the library, or publishers for additional resources.

*(Note: You will need to determine the appropriate number of modules/topics for your course. Six are shown below as an example.)*

Learning Objectives	Instructional Activities	Instructional Resources
