

Learning Objectives Table

Please use the following table to help you consider the instructional activities and assessment methods for your course. As we have discussed in class, you should:

1. Start with articulating the learning objectives,
2. Then determine the means of assessment that will provide evidence of students achieving the learning objectives.
3. Plan the learning activities that align and prepare the students to achieve the learning objectives and success on the assessments

You might want to reference Bloom's Taxonomy of the Cognitive Domain to help you articulate the learning objectives for your course.

(Note: You will need to determine the appropriate number of modules/topics for your course. Six are shown below as an example.)

Learning Objectives	Instructional Activities	Means of Assessment
Module 1 – Topic <i>Learning Objective for this topic</i>	Learning activities	How will students be assessed?
Module 2		
Module 3		
Module 4		
Module 5		
Module 6
