SPECIAL SECTION

The University of Rochester Celebrates Faculty and Student Honors 2013-14

Celebrating Distinction

The University of Rochester congratulates faculty and students who have earned national recognition and teaching awards during the past academic year.

Select Citations

Every academic year, Rochester faculty members earn recognition from their national and international colleagues for their research, scholarship, and teaching, as well as for their service to their disciplines and their students. Those honors include awards from national and international academic societies, induction into prestigious organizations and recognition from peer institutions. Similarly, Rochester students are recognized each year by some of the most competitive and highly regarded honors programs available undergraduates and graduate students in the United States. Here's a small selection of honorees from the 2013-14 year.

NATIONAL ACADEMY OF SCIENCES

G. Allyn Professor of Medical Optics, dean for research in Arts, Sciences & Engineering, and director of the Center for Visual Science, was elected to the National Academy of Sciences. Widely considered one of the world's leading experts on human vision. Williams has pioneered new technologies to improve eye-

David Williams. the William

sight for people who are legally blind as well as for those with Associate Professor of Clinical Nursing 20/20 vision. One of the highest honors accorded a scientist in the United States, membership in the academy is based on out standing research contributions as judged by peers in the field. Williams was one of 84 scientists selected for 2014

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

Xi-Cheng Zhang, the M. Parker Givens Professor of Optics and director of the Institute of Optics, and Karl Kieburtz, the Robert J. Joynt Professor in Neurology and director of the Clinical and Translational Science Institute, were elected fellows of the American Association for the Advancement of Science. Recognized for his research on the terahertz band of the electromagnetic spectrum, Zhang also received the Kenneth J. Button Prize from the International Society of Infrared, Millimeter, and Terahertz Waves. An expert on neurodegenerative disorders such as Parkinson's and Huntington's diseases, Kieburtz has served as principal investigator for several clinical studies.

of earth and environmental sciences, was named a fellow of the American Geophysical Union. Ebinger's field research and other studies on the interaction of tectonic plates has helped shape the understanding of continental rifts, volcanic activity, earthquakes, and other geological

processes.

ASSOCIATION FOR COMPUTING MACHINERY

Henry Kautz. professor and chair of computer science, was named a fellow of the Association for Computing Machinery, one of the world's most prominent scientific and educational organizations dedicated to computing. The first director of the University's Institute for Data Science, Kautz is a leading researcher on machine learn-

ing, pervasive computing, search algorithms, and assistive technology. He is a former president of the Association for the Advancement of Artificial Intelligence.

INTERNATIONAL SOCIETY FOR SELF AND IDENTITY **Richard Ryan,** professor of clinical and social sciences in psychology, and **Edward Deci,** the Helen F. and Fred H. Gowen Professor in the Social Sciences, received the Lifetime Career Award from the International Society for Self and Identity. In their 1985 work, Intrinsic Motivation and Self-Determination in Human Behavior, Deci and Ryan articulated what has become known as self-determination theory, which has since become one of the leading theories of human motivation. The theory has helped shape three decades of clinical and research efforts to advance health, spirituality, peace, and human fulfillment

was cited for her research in optical design and engineering, including work that may lead to new, noninvasive technologies for conducting biopsies as a way to detect skin cancer.

PACKARD FOUNDATION

Vasilii Petrenko. assistant professor of earth and environmental sciences, received a David and Lucile Packard Foundation Fellowship for Science and Engineering. He was one of just 16 scientists selected for the fellowship that was established to allow some of the nation's most promising scientists to pursue

science and engineering research early in their careers. He also received the University's G. Graydon Curtis '58 and Jane W. Curtis Award for Nontenured Faculty Teaching this spring.

POETRY INTERNATIONAL

Jennifer Grotz, associate professor of English, received the C.P. Cavafy Award, an annual prize administered by the editorial staff of the journal Poetry International, A cowinner of the award, Grotz was cited for her poem "Watchmaker," part of her forthcoming collection, The Window Left Open. A poet whose work has been anthologized in recent volumes of the

tor of the Bread Loaf Writers' Conference in Middlebury, Vt.

ROYAL ACADEMY OF MUSIC

Steven Doane, professor of violoncello at the Eastman School, was named an honorary member of the Royal Academy of Music. Founded in 1822, the academy is now a college of the University of London, where Doane was also appointed a visiting professor of strings. The academy limits honorary membership to 300 musicians from around the world who did not attend the academy as students.

ROYAL COLLEGE OF PHYSICIANS OF EDINBURGH

of medicine at the School Highland Hospital, was named a fellow of the Royal College Granted a royal charter in 1681, the college is an independent professional membership

organization whose fellows and members represent 91 countries. Fellows are elected based on their contributions to the practice of medicine, medical science.
