

UR STUDENT NEWSLETTER

System Onboarding Begins for AS&E and ESM, vol. 11

This bulletin has been designed to help you prepare for UR Student user activities as the system is prepared for production use. A copy of all UR Student Newsletters will be located on the [UR Student Project Newsletter](#) page. Our next update will be provided Friday, March 20th.

OVERALL PROJECT STATUS

- Curriculum Management - Live (December 2019)
- Records & Advising - Live (February 2020)
- Student Finance - In E2E Testing; go-live July 1, 2020

HIGHLIGHTS

- Onboarding was kicked off for AS&E and Eastman undergraduate and graduate students this past Monday, March 2. To date, 862 students have successfully completed onboarding.
- AS&E and Eastman published their Fall 2020 Schedule within UR Student today, March 6. Warner will finish publishing their Fall 2020 Schedule early next week.
 - Some labs, workshops and recitation sections for AS&E don't yet have rooms assigned; this work will be completed in the next few weeks before registration.
- The Fall 2020 schedule has been published to the new CDCS site at <https://cdcs.ur.rochester.edu/>
 - The site was just launched today and is in the process of being stabilized so you may experience longer search times or pop-ups that are in the process of being remediated; the site is available and can be used to access the Fall 2020 schedule
 - CDCS will be updated 7 days per week
 - There still is an administrative interface to CDCS but the only fields on a course that are updatable are the checkboxes Diversity and Community-Engaged Learning; all other data comes from UR Student
- The legacy CDCS (that includes all data before Fall 2020) is back online at a new location: <https://cdcs204.ur.rochester.edu/>. It was offline temporarily due to some data being accidentally published to the site.
- The support team continues to work through service requests received by the community and manage escalations through the daily standups with the Champions in the schools.
- The Mock Onboarding, Advising and Registration events for AS&E, Warner and Eastman were held this week. Feedback from the students and support staff that participated in the events will be used to inform our training materials and marketing campaign in preparation for registration.

TRAINING

- As a reminder, training is required for staff before you can access the system
- Training in cohort maintenance was provided this past week and Advising training has also begun and will continue through April / May.
- If you have not been able to attend training but need access to the system, please contact your [Project Champion](#)

HELPFUL LINKS
