How Are Digital Technologies Redefining the Goals of K-16 Education?

Thursday, November 21, 3:00-4:30 pm in LeChase 215

Advances in technologies are continuously changing job opportunities, and have also impacted the knowledge, skills and mindsets our students need to be successful in this ever-changing environment, with unprecedented access to information and data.

Are we preparing K-16 students adequately to this new reality?

What will K-16 students need to be successful in tomorrow's workplace?

Join us for a conversation on this topic, to be started by a panel representing complementary perspectives and areas of expertise:

Panelists:

Joe Testani, Executive Director, Greene Center for Career Education and Connections, University of Rochester

Mary Grow, Superintendent, East Irondequoit Central School District

James Hall, Dean, School of Individualized Study, Rochester Institute of Technology

Moderator:

Raffaella Borasi, Director, Center for Learning in the Digital Age, Warner School of Education University of Rochester
