LiDA Colloquium Series

How will technology help us address the LEARNING GAPS caused by the pandemic?

Wednesday, November 17, 3:30-4:30 pm EST

TO REGISTER go to:

https://rochester.zoom.us/meeting/register/tJ0sdOmupjorGtCu9vfFQFrnicKuikM3GNw3

We are all very aware that, despite best efforts, the disruptions brought along by the pandemic have negatively affected learning for most students – especially, but not only, in K-12 schools. Instructors cannot assume the same "starting point" or baseline knowledge they expected of students in the past. And this situation is likely to have a ripple effect on curriculum and testing for years to come. In this session we will hear from both K-12 and higher education educators about specific challenges and solutions they have experienced, as well as share other ideas. Understanding how administrators and teachers have dealt with these new challenges is essential if education is to productively move beyond the pandemic.

"Conversation starters":

A. **Director, K-12 School Leadership Preparation Program** *(Andrea Cutt, University of Rochester)*
B. **Elementary Teacher and Math Interventionist** *(Nicole Charles, East Irondequoit Central School District)*
C. **Literacy Specialist** *(Alexa Basile, East Lower School, Rochester City School District)*
D. **Assistant Principal** *(Andrea Marsh, Washington Middle School, Jamestown Central School District)*

Please join us in this public and free event, so we can all learn from each other's experiences and insights
