# Data Visualization with Tableau

Thursday, April 26, 3:00 pm to 4:30 pm in LeChase 215

Facilitator: Lauren Di Monte, Data & Research Impact Librarian at the University of Rochester

Get ready for our last LiDA session for this academic year. [Ms. Lauren Di Monte](), a data & research impact librarian at the University of Rochester, will facilitate a workshop on data visualization.

In this beginner-level workshop you'll get a hands-on introduction to creating interactive data visualizations with Tableau Public, a free data analysis and visualization tool. In this session you will:

- Get introduced to the Tableau toolset;
- Create an interactive map; and
- Learn how to pull everything together into a shareable dashboard.

This workshop series is designed for beginners. No experience with Tableau, data, or data analysis is required. But, it would help to get your Tableau account set up before the workshop, so see the steps below.

In advance of the workshop please complete the following steps:

1. Download <https://public.tableau.com/s/download?source=cta> and install Tableau Public on your laptop;
2. Create a Tableau Public Profile <https://public.tableau.com/en-us/s/#moda-signup>
3. Download the data files https://drive.google.com/drive/folders/1TlymA_AJWtz7aKwkvpf3JAcmnyXE7mah?usp=sharing (one .xls file; two PDF files)

Please bring your laptop that you have installed Tableau to the workshop.

We look forward to seeing you.

Kind regards,

LiDA Study Group
