

## Where Learning Takes Space: A Theory of Learning in Second Life Thursday, Oct 26 from 3:00 pm to 4:30 pm in LeChase 215 (Genrich-Rusling Room)

Facilitated by Yen Verhoeven, Ph.D. Candidate at Warner School

What does learning look like in the virtual world of Second Life? Using a modified Vexations and Ventures style format (Settlage, Johnston, Meadows, Harkins, & Kittleson, 2007), Warner Ph.D. candidate Yen Verhoeven presents her work-in-progress on a virtual theory of learning from her research at the Builder's Brewery, an international school in Second Life. Yen's theory connects learning to the virtual spaces where interactions happen. Participants (from LiDA and the Builder's Brewery community) are invited to participate in person or join remotely via Zoom at <https://rochester.zoom.us/j/567750891>, as we engage in collaborative inquiry and scholarly discussions to provide constructive feedback and suggestions to improve Yen's work and advance our understandings of learning in spaces.

We look forward to seeing you there.

Kind regards,

LiDA Study Group
