

LiDA Colloquium Series

Exploring Infiniscope: Tapping into NASA data and imagery for adaptive learning

Thursday, March 7 @ 3:00 pm - 4:30 pm in LeChase 215

Guest Speakers: A. Joseph Tamer Assistant Director, [ETX Center](#) and Jessica Swann Community Manager (Arizona State University)

Grab your laptop or Chromebook* and join us for this hands-on LiDA session to explore the online educators' network and adaptive experiences that make up [Infiniscope](#). Using NASA data and visualizations, Infiniscope explorations allow students to take virtual field trips on Earth and in Space, to build knowledge and spark their curiosity. In this session, our guests will guide us through two of the explorations and show us how teachers contribute content to the shared network of Infiniscope. To get the most out of participating, please bring your laptop and make sure you request to ["Join Infiniscope as an Educator"](#) by [providing your information in advance here](#).

We look forward to seeing you there.

* Note: iPads not recommended for this platform.
