

LiDA Colloquium Series

GenAI Uses that Can Increase Educators' Productivity

Wednesday, March 20, 3:30-4:30 pm EST

To register:

https://rochester.zoom.us/meeting/register/tjYscuigpzlsGd0lq83NyzM4_1chxj4lxGWU#/registration

While a lot of attention seems to be focused on implications of GenAI for teaching and learning, it is also important to consider how GenAI may support educators in other important functions - such as advising, reporting, planning, communicating with various constituencies, etc. In this session we will hear from K-12 and higher education faculty and staff about these important complementary uses of GenAI, and their potential impact.

“Conversation starters”:

- A. **GenAI uses in higher education student services** (*Andrea Barrett, Warner School of Education & Meghan Plate, Health Lab, University of Rochester*)
- B. **GenAI uses in higher education communications** (*Brian Piper, University Communications, University of Rochester*)
- C. **GenAI uses by K-12 administrators** (*Cory Allen, Spencerport Central School District*)
- D. **GenAI uses by K-12 teachers** (*Mike Newman, Newark Central School District*)
- E. **GenAI uses to improve K-12 operations** (*Greg Baker, Daniel Marshall, Aaron Mumby, Penn Yan Central School District*)

Please join us in this public and free event, so we can all learn from each other's experiences and insights.
