

CENTER FOR LEARNING IN THE DIGITAL AGE (LiDA)

# LiDA Colloquium Series

---

## FALL 2025 PROGRAM

Welcome to the Fall 2025 LiDA series. As last year, we will launch this series with a networking session to help us identify opportunities for connections and collaboration, and then focus on drawing implications of AI for our work - given its potential to transform education.

As before, except for the first event, each Zoom session will include a few panelists offering short “conversation starter” presentations, followed by small group conversations in break-out rooms. Recordings of all “conversation starters” will be posted on the LiDA website.

Join us for any or all of the following virtual events:

**Wednesday, October 1, 3:30-4:30 pm EST: *LiDA PROJECTS’ Showcase and Connections***

As it has been our tradition, our first Fall event is designed to provide an opportunity to share updates on current LiDA-related projects and make connections. For this event, we will set up breakout rooms by “theme” and invite participants working on/interested in that theme to briefly identify related projects and interests, followed by facilitated conversations. Written brief descriptions and updates about featured projects will also be made available on the LiDA Colloquium website for reference. [Register here.](#)

**Tuesday, October 21, 3:30-4:30 pm EST: *Promoting AI Literacy***

Given the pervasive use of AI in many jobs and even everyday life, all educators are called to promote AI literacy for the students they serve, to ensure that they can use AI in effective, safe and ethical ways. In this session, we will grapple with what this new responsibility means for each of us, informed by the experiences of some of our colleagues who are working with different audiences. [Register here.](#)

**Monday, November 17, 3:30-4:30 pm EST: *AI in Education across the World***

There is a lot that we can learn about the implications of AI for education by looking at applications and implications of AI in schools and universities beyond the U.S. In this session, we will hear about educational uses of AI in other parts of the world to inform a conversation about what may be taken-for-granted assumptions about the potential and limitations of AI for education. [Register here.](#)

**For more information and registration for each event, visit our LiDA website at:**
